Subject: Request for Permission to Use Intel Unnati Lab for GAN Model Training

Respected Sir/Ma'am,

We, Somnath Paul and Monojit Das, students of B.Tech (CSE – AI & ML), 4th Year, would like to request permission to use the Intel Unnati Lab for our ongoing project work under the guidance of Soumya Paul Sir.

Our project involves training a Generative Adversarial Network (GAN) model, which requires high computational resources due to the large dataset being used. Unfortunately, our personal devices are not capable of efficiently handling this training process. Hence, we would like to utilize the Unnati Lab's infrastructure to train and test our model effectively.

We assure you that we will use the lab resources responsibly and follow all necessary rules and protocols during our work.

We kindly request you to grant us permission to access the Intel Unnati Lab for this purpose.

Thanking you,
Yours sincerely,

Somnath Paul
